

## **Ms. Le Duy-Loan, Houston, Texas**

Ms. Le graduated as Valedictorian of her high school at the age of 16, and began her career at Texas Instruments as a memory design engineer at the age of 19. Ms. Le has held many critical leadership positions in the company, and currently is on the Board of Directors for National Instruments. Her long list of technical achievements includes 20 technology patents and 8 pending applications. She was inducted into the Women in Technology International Hall of Fame in June 2001 and named National Women of Color Technologist of the Year in 2002. Ms. Le holds a bachelor's degree in electrical engineering from University of Texas, and an MBA from the University of Houston.

Ms. Le is our keynote speaker and will talk about how she aligned her passion with her career, and how she set goals throughout her life to achieve success and become famous within corporate America. Come and get inspired by this amazing woman.
